

## Tree River

Large male ~~arctic char~~...

Original caption:

*Okay the picture is not taken by myself, since I am on the picture... But it was taken with my camera! This is the second largest arctic char I landed on my Nunavut trip, 98 cm long and 51cm around the belly. The fish was of course released, and we estimated it at 11 kg. One of the most beautiful fish I have been lucky to catch. On a pink Intruder fly, and 14 foot Spey rod.*

Dolly Varden,  
as I see

## ~~ARCTIC CHAR (Salvelinus alpinus)~~

Dolly Varden,  
as I see

Frank Bluch recently in his annual trip to Canada where he fishes with local guide Mike Harrison when fishing on Tree River, which produced two pending ~~Arctic char (Salvelinus alpinus)~~ class records for Bluch. The bigger of the two was this 9.64 kg (21 lb 4 oz) while casting a Dumbell Strip Tease fly.
